**Notice of Fee Increase on January 1, 2003**

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

***Response to Amendment***

The following is in response to the amendment filed on February 28, 2003.

Claims 1-63 are allowed.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose a method of making tissue comprising transferring a wet tissue web to a sculpted tissue-making fabric having alternating parallel nonwoven raised elements and depressed regions, whereby at a transition region between two background regions, a first raised element in a first background region becomes a depressed region in a second background region and a first depressed region in the first background region become a second raised element in the second background region. The prior art does not disclose such a structure for a nonwoven tissue-making fabric. Similarly, the prior art does not disclose or suggest a tissue product made from the claimed fabric. The claimed fabric imparts a surface structure and texture that distinguishes the claimed tissue from prior art tissues, while also providing a tissue with uniform density instead of a tissue with alternating compacted regions and low density regions.

Prior art fabrics for making tissue webs which have nonwoven surfaces typically comprise resinous structures elevated from the surface of a base fabric forming a pattern, such as the fabrics discussed in patents by Trokhan, Phan, or Gaisser. None of these prior art fabrics have surfaces resembling the surface of the claimed sculpted fabric. These prior art fabrics also result in papers having a different surface structures and different localized densities.

***Response to Arguments***

Applicant's arguments have overcome the objection to the specification presented in the previous office action. Applicant has provided sufficient evidence that the orientation of the warps and shutes are consistent with conventional terminology regarding fabrics woven in endless form in contrast to the terminology describing flat woven fabrics, which was incorrectly applied by the Examiner.

Applicant's arguments have also overcome the rejection of claims 23, 42, and 43 under USC 112, second paragraph presented in the previous office action. The Applicant has provided sufficient supporting evidence for the definitions of the terms "filled", "non-macroscopically monoplanar", and "macroscopically monoplanar" as used in the claims.

***Drawings***

The proposed drawing corrections and the proposed substitute sheets of drawings, filed on February 28, 2003, have been approved.

New corrected drawings are required in this application because the faxed copies of the proposed drawings do not clearly show all of the details.

The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

***Terminal Disclaimer***

The terminal disclaimer filed on March 13, 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application No. 10/015,837 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Hug whose telephone number is 703 308-1980. The examiner can normally be reached on Monday through Friday, 9:00 AM to 6:00 PM.
